

# RELEASE NOTES

## V.15.2 | SEPTEMBER 2022

Thank you for taking a moment to review the latest McCormick Systems release notes. This release will update your software to McCormick Systems V.15.2.

This update is for On-Premise clients only. The previous version for the desktop installation of McCormick Systems is v15.11.

If you have any questions during the update process, you can contact McCormick support at (800) 444-4890.

## MCCORMICK V.15.2 (ON-PREMISE CLIENTS ONLY)

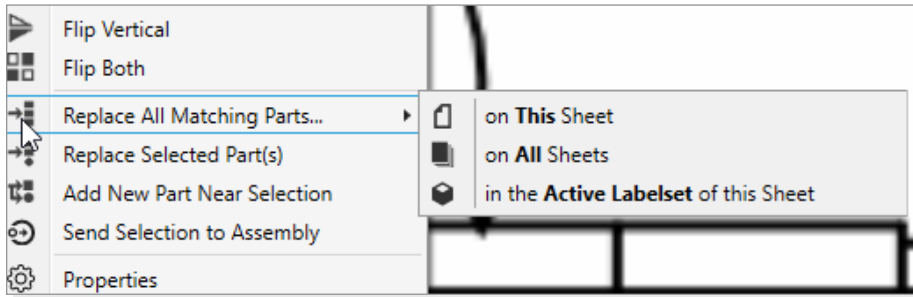

### AUDIT TRAIL

- A new button has been added to Audit Trail entries that will open and highlight the entry on DEP drawings.

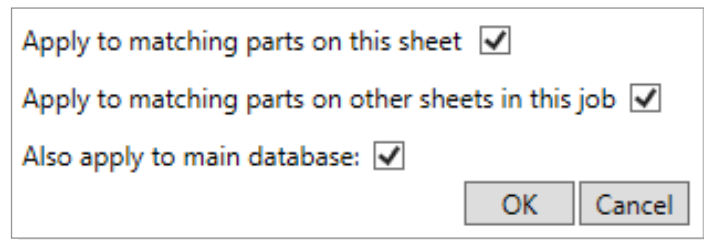

#	Name	I/A	Qty	AdjQ	Mul	AdjM	LF	AdjLF	User	DateTime
15978	50 AMP STD MASONRY	A	18	18	1	1	1	1	Admin	7/20/2022 8:27:06 AM
15963	GFI STD	A	17	17	1	1	1	1	Admin	7/20/2022 8:26:38 AM
15957	DUPLEX STD	A	14	14	1	1	1	1	Admin	7/20/2022 8:26:31 AM

- You can now swap an item by itself, in the label set, or the entire job.

- Two new menu items have been added to McCormick.
  - **Replace All Matching Parts > on All Sheets** replaces every instance of that part across all drawings with the new part.
  - **Replace All Matching Parts > in the Active Labelset of this Sheet** only replaces instances of that part across the specific labelset in the selected sheet.

- A new checkbox, *Apply to matching parts on other sheets in this job*, has been added to McCormick. Enabling this checkbox will allow a part to be adjusted on all drawings when changing the style.

- The ability to adjust the default color and shape of the measuring tool has been added.
- The functionality of locking labelsets in DEP has changed. Previously, the lock would be per user. Now, if a labelset is locked by one user, the lock will persist if another user opens that sheet.
- The Drop Detail now has three states: *text and ring*, *ring only*, and *none*.
- The ability to ignore object opacity settings in printing has been added.
- The drop override box selects all numbers for easier editing.
- A popup notification has been added that notifies you when new versions are available.
- An option to update text overlays when an item or assembly name is adjusted with Takeoff Edit Enabled activated has been added.
- Icons in the Proposal Sheet have been changed to better denote the “Merge” command.
- Resource utilization has been improved application-wide.
- The main app window version has been changed to McCormick and McCormick Pro on applicable systems.
- More Find/Sort options have been added to takeoff. “Equals”, “Contains”, and “Starts With”. Your selection becomes the default.

## BUG FIXES

---

- DEP - An issue with copying and pasting takeoff to a drawing without a scale set has been resolved.
- DEP - The Compare Drawings selector only showed drawings overlaid on the selected sheet, not all overlaid drawings in the job. This has been corrected.
- DEP - An issue in with the option to remove all takeoff with Delete has been resolved.
- DEP - The Capture option may have inserted a new image instead of capturing one. This been corrected.
- DEP - Licenses are now released when DEP is closed instead of the main app.
- Change Order - An error may have occurred when making and deleting change orders. This has been corrected.
- Change Order - An error may have occurred closing an empty Change Order window. This has been fixed.
- Change Order - The auto logout timer now functions with an open change order.
- Bid Summary - You may have experienced issues with exports not generating bidsummary data. This has been corrected.
- Bid Summary - A way to unintentionally select multiple bidsummaries has been corrected.
- Bid Summary - A way to unintentionally change bidsummeries by selecteg different tabs has been fixed.
- Issues restoring some jobs from v14.3 to v15 have been resolved.
- Issues restory a job into remote SQL server have been resolved
- Proposals may have linked to image files instead of inserting the images themselves, causing network issues. This has been corrected.
- TraserSX - Automatic price updates sometimes would not function. This has been resolved.
- TraserSX - Last issue processed field now correctly updates after a price update is run.
- TraserSX - Issues updating items where the DCI code had no spaces has been resolved.
